

## Habanero Product Change Notification

PCN Tracking: HAB-0001\_v1.0

Issued Date: 2026-05-20

Effective Date: 2026-07-01

### Dear 8devices Customer,

We are sending this letter to inform you about the changes of the product or products you have purchased. 8devices announces the product change for the Habanero WiFi module. More details can be found in the table below:

### Affected product list

- Habanero-I Wi-Fi module
- Habanero Wi-Fi module
- Habanero DVK

### 8devices Habanero RF shield upgrade notification

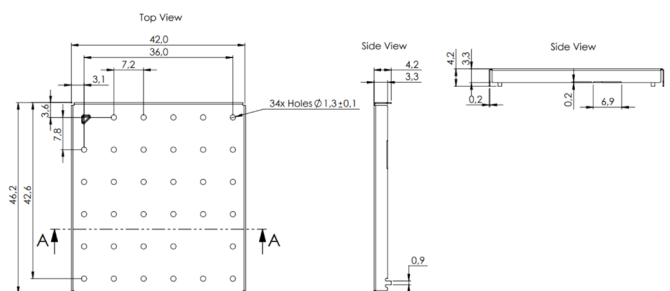

Old RFFM8528TR7 no longer available at reasonable price, no pin to pin alternatives available. Introducing new 5Ghz FEM, Part number SKY85716-11. New Habanero module is pin to pin compatible with current version.

Due to design change, certification below will be no longer valid\*:

- CE, UKCA
- FCC, IC
- MIC

\*only applies to new design modules, current version not affected.

Introducing clip-in shields for quality improvement as a proactive and effective step in enhancing the quality control process on our production line. AOI will help identify defects and inconsistencies in manufactured products, which is crucial for maintaining high-quality standards.

### Impact and recommended actions

Tests showed that there is no negative impact to the Rf side. Test results available on request.

Devices will certify new design modules by the end of 2026.

Tests showed that there is no negative impact to the device.

## 8devices Habanero marking upgrade notification

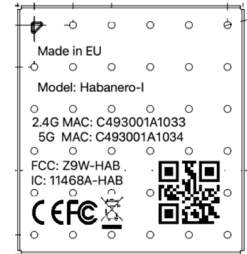

Introducing Laser engraving to automate processes and improve quality.

### Impact and recommended actions

Tests showed that there is no negative impact to the device.

Current

New

8devices hopes that this announcement assists you in planning your future requirements.
